Profile summary

Communication and Computer Engineering student at Mansoura University with hands-on experience as a Product Owner Intern. Passionate about building impactful digital solutions and applying Agile practices to manage the product lifecycle. Proven ability to translate business requirements into clear user stories and acceptance criteria. Deeply committed to a "customer-first" approach, bridging the gap between cross-functional teams to deliver high-quality, user-centric products.

Education

Mansoura University

Mansoura, Egypt

Faculty of Engineering Bachelor's Degree in Communications and Computers Engineering.

Oct 2022 - Present

• **Grade:** Very Good (CGPA: 3.35/4.00)

• **Expected Graduation:** January 2027

Experience & Projects

Product Owner Intern | Zikola Agency

May 2026 - Present

Requirement Gathering: Collaborating with cross-functional teams and stakeholders to analyze business processes and document clear process flows and requirements.

Product Documentation: Assisting in writing and translating business needs into detailed user stories and acceptance criteria.

Quality & Review: Participating in product reviews and ensuring final deliverables align with the initial business requirements and user needs.

Graduation Project: Technical Talent Assessment Platform

- **Role: Team Lead & Product Owner.**
- **Agile Execution:** Managed a prioritized product backlog and facilitated Agile practices (including sprint planning and team syncs) for a cross-functional development team.
- **Strategic Impact:** Defined the MVP scope for an automated technical evaluation platform, balancing technical feasibility with user value.
- **Logic & Execution:** Designed secure execution environments and workflows, ensuring scalable and user-centric solutions.
-

Zombie Package Detector (Supply Chain Quality Tool)

- **Role:** Lead Researcher & Developer.
- **Optimization & Automation:** Developed an automated tool utilizing rapid prototyping to monitor the maintenance status and "pulse" of third-party dependencies.

- **Quality Assurance:** Built robust workflows that detect unmaintained libraries, mitigating supply chain risks and significantly reducing technical debt.

Security Intelligence & Workflow Automator

- **Role: Developer & Product Logic Designer.**
- **Efficiency:** Designed a serverless Python pipeline to automate technical data gathering, reducing manual research time.
- **Value Delivery:** Optimized the delivery of curated technical insights to users through seamless integration with communication platforms.

Core Competencies

- **Product Management:** Backlog Management, User Stories & Acceptance Criteria, Process Flows, Release Planning, Requirement Gathering.
- **Methodologies:** Agile Principles, Software Development Life Cycle (SDLC).
- **Tools & Tech:** Familiar with Figma and Miro, AI Prompt Engineering.
- **Execution & Soft Skills:** Cross-functional Communication, Customer-First Mindset, Detail-Oriented, Collaborative Problem-Solving.

Certifications

- | | |
|--|----------|
| • OWASP Top 10: Web Security Fundamentals – Mahara-Tech (ITI Egypt) | Jul-2025 |
| • Elements of AI for Business – University of Helsinki & MinnaLearn. | Aug-2025 |
| • Delivering Quality Work with Agility – IBM (via Coursera). | Sep-2025 |

Activities

- | | |
|--|---------------------|
| • HR Member – Dynamix Team, Mansoura University | Dec 2024 - May 2026 |
| - Coordinated recruitment processes and improved candidate evaluation workflows. | |
| - Organized and managed training sessions, enhancing engagement and retention. | |
| • Cyber Security Volunteer – IEEE | Feb 2026 - Present |
| - Studying web security fundamentals and applying structured analytical thinking in problem-solving. | |

Languages

- | | |
|--------------------------------|---|
| • Arabic – Native Proficiency. | • English – Professional Working Proficiency. |
